SUMMARY

Angular Developer with 4 years of experience in building and optimizing enterprise-scale web applications in the banking and financial domain. Experienced in developing secure, high-performance Angular applications using TypeScript, RxJS, NgRx, and RESTful APIs. Led performance optimization initiatives for Bank of New York Mellon applications, improving load time and user experience through lazy loading, change detection optimization, and API enhancements. Skilled in Angular architecture, component-driven development, unit testing (Jasmine, Karma), and secure authentication using JWT. Strong experience in improving application scalability, UI consistency, and code quality through reusable component libraries and CI/CD automation. Adept at collaborating with cross-functional teams in Agile environments to deliver reliable and maintainable frontend solutions.

EXPERIENCE

Web Developer- BNY (Banking & Financial Domain)

INFOSYS LTD

JUNE 2024 - Present, Pune

- Led Angular application development for Bank of New York Mellon, optimizing RESTful API integration and improving application performance, reducing load times by 40% and increasing user engagement by 25%.
- Developed unit test cases with 80%+ coverage, reducing production bugs by 35% and improving application stability and reliability.
- Translated Figma designs into responsive, WCAG-compliant Angular interfaces using UDS standards, improving accessibility scores by 30% and ensuring seamless cross-browser compatibility across 5+ browsers.
- Implemented Reactive Forms, route guards, lazy loading, HTTP interceptors, and JWT authentication, improving application security and reducing API response handling time by 25%.
- Built reusable Angular components, services, and modules, improving development efficiency by 20% and reducing UI inconsistencies by 65%.
- Collaborated with cross-functional teams using Git and Jira, resolved 95% of production issues within SLA timelines, and contributed to Infosys' internal Angular framework, improving code reusability and reducing development effort by 30%.

Web Developer- Optus (Telcom & Networking Domain)

INFOSYS LTD

November 2022 - May 2024, Pune

- Designed, developed, and tested enterprise-scale Angular applications using Angular, TypeScript, HTML5, CSS3, RxJS, and NgRx, improving application load performance by 35% through optimized change detection and state management.
- Led migration of legacy AngularJS applications to Angular using Single-SPA Micro Frontend architecture, enabling independent deployments and reducing build times by 40%.
- Built reusable UI component libraries using Angular Material, AG Grid, and Kendo UI, reducing duplicated development effort by 25% and ensuring consistent UI across applications.
- Integrated RESTful APIs using Angular services and RxJS with robust error handling and performance optimization, reducing API response latency by 20%.
- Improved application reliability by implementing unit and integration testing using Jasmine and Karma, increasing test coverage by 22% and reducing production defects by 15%.
- Optimized CI/CD pipelines using GitLab and improved frontend performance through lazy loading and bundle optimization, reducing deployment cycle time by 40% and improving rendering speed by 28%.

EDUCATION

Bachelor of Engineering (Mechanical)

Dr. D Y Patil School of Engineering • Pune • 05/2022 • 7.44 / 10.0

• CGPA: 7.44 / 10.0.

SKILLS

Angular (Latest Versions), Angular CLI, Angular Material, RxJS, NgRx, Angular Signals, AG Grid, Reactive Forms, Lazy Loading, Performance Optimization, REST API Integration, JWT Authentication, HTTP Interceptors, Bootstrap 5, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Jasmine, Karma, Unit Testing, Agile Methodology, Scrum, Debugging, Troubleshooting, Responsive Web Design, Git, GitLab, SonarQube, Postman, Jira, Visual Studio Code, Windsurf, RESTful APIs, Cross-Browser Compatibility, API Integration
